Step 1.

Open the hood and remove the factory grille. Unclip the factory grille inserts from the grille. Test fit the billet insert into the grille. The picture shows how the J hooks hold the billet in place.

Step 2.

Center the grille and drill a 1/8" hole at each J hook. **Do not drill through the face of the grille.** Use the #8 screws to secure the J hooks. Do not over-tighten the hardware. Re-install the grille assembly back onto the vehicle.
